The NJWEA Awards Committee is continually soliciting candidates for the Association and Federation Awards.

Any active member of the NJWEA who has made significant contributions to the Association, the field of water pollution control or municipal and / or industrial waste treatment may be considered for an award.

All nominations for awards must be accompanied by a resume emphasizing the candidate's activities and contributions that warrant recognition.

Nominations for the NJWEA and WEF awards should be submitted before November 1st.

For your convenience nomination forms are available from members of the Awards Committee or the NJWEA Executive Director.

JANET HURLEY CANN, P.E.
WEF BOARD OF TRUSTEES

Janet Hurley Cann, P.E., is a member of the 2023-24 Board of Trustees for the Water Environment Federation (WEF), an international organization of water quality professionals headquartered in Alexandria, Va.

Janet began her career in the environmental field more than 40 years ago as a regulator at the South Carolina Department of Health and Environmental Control (SCDHEC) and continued her career in public service working for an upstate South Carolina water and sewer service provider. Upon retiring in 2015, Janet continued to work as a consultant for an Upstate engineering firm, until lured back to public service. Throughout the course of her career, she has managed a variety of projects, including collection system expansion, pump station and treatment plant construction upgrades and the development of a collection system hydraulic model. She concluded her career, retiring in 2023, with a focus on the rehabilitation of both distribution and collection systems, asset management, strategic planning, and grant writing.

Janet is in fact a second generation WEF member – her father, Noel Hurley, represented the Water Environment Association of South Carolina (WEASC) as Director, a forerunner to the Delegate, in the late 1980s. She has been a member of the WEASC since 1985 and WEF since 1987.

Janet has held many leadership roles, including service on numerous WEASC committees, the Association Secretary from 1987 to 2003, as

President from 2009-2010, and WEF Delegate from 2010-2013. She has participated on several WEF Committees and served WEF as Speaker of the House of Delegates from 2013-2014, Treatment Community of

Practice Director from 2015-2017, and Vice Chair and Chair of the Committee Leadership Council from 2017-2021.

Janet is a native of South Carolina, currently residing in Spartanburg, SC, with her husband and two children. She received her Bachelor's Degree in Civil Engineering from Clemson University and Master's Degree in Civil Engineering from the University of South Carolina. She is a licensed engineer and biological wastewater operator trainee in the state of South Carolina.

**WATER ENVIRONMENT FEDERATION
ARTHUR SIDNEY BEDELL AWARD
2024**

JOHN J. MCNAMARA

John worked at the Joint Meeting of Essex and Union Counties Wastewater treatment facility from November 1977 to July 2016, 39 years. John began as a plant operator and was promoted to Operations Shift Supervisor. He holds an S-2 NJDEP wastewater operator's license. He was transferred to the Joint Meeting Projects Department as Assistant Projects Manager and ultimately as Project Department Manager.

As a member of the North Jersey Section, he volunteered to help for several years with registration of members at section meetings and workshop meetings. He was Chairmen of the North Section Golf Outing for several years. He is very active in the NJWEA Annual Conference Management Committee and the Logistics Coordinator.

He has received the North Section Select Society of the Outhouse Award, the WEF Quarter Century Operators Club, North Section Service Award, Select Society of Sanitary Sludge Shoveler's Award, North Section T. William Cleveland Jr. Award, Golden Manhole Society Award, WEF Harry P. Croft Award and he is a WEF Life Member.

WATER ENVIRONMENT FEDERATION
WILLIAM D. HATFIELD AWARD
2024

ANTHONY DEICICCO

Anthony began his career with Environmental Labs in 1986 after Graduating from Rowan University with a BS in Biology. Around that time, Hammonton was mandated to construct a new advanced wastewater treatment plant as they were one of the two remaining Pinelands Communities in Atlantic County with treatment facilities not part of the regional network and were required to meet background water quality standards. Anthony joined the Hammonton Sewer Department in 1994 when the new plant came online as a Lab Tech/Laborer. He was and still is instrumental in the success of the Orbal System that was chosen as the treatment system to meet the stringent advanced treatment standards.

Anthony became the licensed operator in 2000 holding then an S-3 which is the required license for the facility and achieved his S-4 in 2002. In 2011, the Town consolidated its Water and Sewer Departments into one whereby for many decades were separate operations. Anthony became in charge of the combined utility at that time. Anthony also holds C-3, a T-3 and a W-3 licenses.

Some noteworthy accomplishments throughout his career involved the management of the ancillary land application site consisting of 188 acres where the Town was obligated to cease surface water discharge and to recharge their approximate 1.0 MGD effluent into this land mass through a series of rapid infiltration trenches. The trenches did not consistently recharge, and the Town had to continue intermittently discharging to Hammonton Creek which is tributary to the Mullica River. Through the years with the cooperation of Anthony and his staff, the Town instituted a drip irrigation system in the overland portion as well as the portion of the land mass that doubles as a recreational complex. For the recreational fields, the drip system is underground and addresses the root mass. With the combination of the rapid infiltration trenches, the overland and subsurface drip irrigation system, the operation has successfully eliminated surface water discharge and recharges the approximate 1.0 mgd to the aquifer.

Following 31 years of dedicated service to the Town and his community, Anthony will be retiring in the upcoming months with an exemplary record of operation of the Town's utility systems.

WATER ENVIRONMENT FEDERATION LABORATORY ANALYST EXCELLENCE AWARD 2024

ALEXIA BARLIKAS NORTH HUDSON SEWERAGE AUTHORITY

Alexia Barlikas has been the Laboratory Supervisor for the North Hudson Sewerage Authority for over 10 years. She is responsible for managing two NJ-ELCP certified laboratories, as well as all compliance sampling, process sampling, and data reporting. During her time at NHSA, she successfully implemented several new analytical methods and

equipment upgrades, which have improved productivity and data quality in the laboratory.

In addition to being Lab Supervisor, Alexia is also a Regional Laboratory Coordinator for Jacobs. Under this role, she works with other WW and DW labs within the company, providing analytical training, onsite technical support, and QA/QC guidance. She was recognized in 2022 with the Jacobs OMFS Teamwork Award for her laboratory expertise.

Alexia has over 20 years of experience working in various laboratory settings. She began her career at Rutgers, starting as a Lab Assistant while earning her B.S. in Marine Science. With the Nutrient Biogeochemistry Group at IMCS, she worked alongside distinguished staff and graduate students, gaining the foundational skills of working in a lab and performing environmental research.

After leaving Rutgers, she began her tenure in the industry as an Environmental Technician for the Interstate Environmental Commission. With the IEC, she developed her wastewater and ambient water quality knowledge. In addition to her responsibilities of compliance sampling and analyses in their NELAP certified lab, she also worked on important long-term monitoring projects, such as the Long Island Sound Study.

Her career transitioned to consulting when she joined Nova Consulting as Staff Scientist. During her time with Nova, she worked predominantly on large-scale projects for NYCDEP. Alexia spent several years polishing her wastewater skills while working on the DEP's PO-88 Applied Research Project.

She was responsible for maintaining the daily operation of PO-88's field laboratory, which generated most of the analytical data for the Study and Optimization phases of BNR implementation at some of NYC's largest WWTPs.

In her free time, Alexia loves being home with all her rescue pets. She also enjoys gardening, hiking with her dogs, and watching Ancient Aliens.

WATER ENVIRONMENT FEDERATION DELEGATE SERVICE AWARD

FOR RECOGNITION OF OUTSTANDING SERVICE TO THE MEMBER ASSOCIATION AND THE WATER ENVIRONMENT FEDERATION

JEROME A. HARRIS, P.E. 2020-2023

Jerry Harris recently completed a three-year term as a NJWEA Water Environment Federation Delegate. During his term he participated in the Conference Resources, Water Communications, and House of Delegates of the Future Work Groups.

A licensed Professional Engineer, Jerry obtained a BS degree in Civil Engineering from Rutgers University and an MS degree in Sanitary Engineering from the New Jersey Institute of Technology. Upon graduation from college, Jerry started his career with the U.S. Army Corps of Engineers New York District Construction Division before moving on to the USEPA Region II Construction Grants Program in New York. Over the years he has been associated with several consulting engineering firms. In that role he assisted municipalities and authorities with the planning, design, permitting, construction, and operation of water and wastewater facilities. Jerry recently retired after thirteen years as a Project Manager with CME Associates in Parlin, N.J.

A long time NJWEA member, Jerry is currently, or has previously been, a member of the following Committees: Constitution and By Laws (current Chair), Executive (currently an At-Large Member), 100-Year Anniversary, Collection Systems, Program, Professional Engineers, and Long-Range Planning. He is also a Member and a Past President of the NJWEA Central Section. Jerry is a recipient of the NJWEA Harry P. Croft Award and the WEF Arthur Sidney Bedell Award and has been inducted in the NJWEA Select Society of Sanitary Sludge Shovelers and Golden Manhole Society. He is proud to have contributed to the professional advancement of the NJWEA by serving as a presenter and moderator at the Annual Conference.

MONTANA CONSTRUCTION

Founded in 1993, Montana Construction is a family-owned and operated business by three siblings:

- Lisa S. Ballerini, President
- Vincent Santaite, Vice President
- Dominic Santaite Jr., Director of Operations

Each company leader was taught the fundamentals for developing and operating a successful construction company from their father and longtime construction executive, Dominic Santaite Sr., who instilled the pillars that drive Montana's steady growth today: Integrity, hard work and respect.

**NJ SAFETY SERVICES
FRANK DYKAS · ANTHONY CORREIA**

Frank Dykas:

Frank has served the NJWEA in various capacities since 1989. After several years he became part of the NJWEA convention committee, serving as the Chairperson for the safety workshop. In his over 30 years as a safety professional, he has helped municipalities throughout the state work on their safety programs and helped keep workers safe through products and programs. He has trained an estimated 25,000 employees over the years and has always been more than willing to help with sound safety advice in any way he can. He is a NJ State Certified Fire Fighter, a Certified Fall Protection Competent Person and Emergency Response Instructor. He has developed many programs and courses to prevent injury and death on the job. He has attended many classes on specialized equipment to be able to provide instruction at a high level. He is a past award recipient numerous times and is a proud supporter of the NJWEA.

Anthony Correia:

Forty-Five years of progressively responsible experience in Fire, EMS, Hazardous Materials and Emergency Management, including policy formulation and implementation, funding strategies and human resource development. Ten years' experience as EMS Coordinator for Mercer County, NJ Emergency Management. Member of numerous state, county and municipal level planning committees. Extensive education and training, including FEMA and NFPA programs on organizational management, interpersonal communications and effective teaching techniques. Provided Safety Training for first responders, DPW and sewer workers in Hamilton Township, NJ, Mercer County. Director of Burlington Township Fire Department and oversaw training programs and Health and Safety for the township of Burlington, NJ. Provided OSHA related topics to DPW and Sewer employees in Burlington Township, NJ. Served as a member of the Township of Burlington safety committee.

As partners and founding members of NJ Safety Services LLC,
they continue that work today.

108th ANNUAL CONFERENCE

TIMMERMAN EQUIPMENT

W.E. Timmerman Co., Inc. was founded in 1938 in Whitehouse, New Jersey. Timmerman is the oldest municipal, contractor and industrial equipment sales and service company in the state specializing in environmental products for servicing New Jersey's critical infrastructure. They focus on numerous aspects of equipment including sewer cleaners, sewer inspection and repair equipment; street sweepers; asphalt maintenance equipment; forestry trucks, industrial grinders, and leaf collection machines.

W.E. Timmerman has a fully equipped service and parts facility in Whitehouse as well as several mobile service technicians and parts delivery personnel. Timmerman is proud to support the NJWEA, APWA, PWANJ, NJ Shade Tree, UTCA and various other organizations.

PSI PROCESS / PUMPING SERVICES

Pumping Services, Inc. ("PSI") has represented and supported leading manufacturers of pumping and control systems through our highly trained sales and service groups. Building on our reputation for quality service we have expanded our offerings to include energy efficient high-quality treatment solutions for the water and wastewater market and have become a leading provider of integration services, electrical controls, and SCADA systems.

In our 50th year in business, we launched our powerful new logo. The water drop, pump symbol and green accent represent our continued commitment to conserving the world's precious water resources by providing innovative and energy efficient pumping and treatment solutions.

We are a representative and service facility for the world's leading manufacturers of equipment used in the treatment and transfer of water, wastewater, and other fluids. We serve the municipal, industrial, construction, commercial and utility markets in New Jersey, New York, and surrounding areas.

We compete by providing excellent service, outstanding products and sound technical support and are committed to the highest standards of ethical business conduct. The health and safety of our employees is our first consideration, and we conduct our operations in an environmentally sound and responsible manner.

We take pride in being an employee-owned company and offer a package of compensation, benefits, educational opportunities and a working environment that fosters teamwork and long term, educated, healthy and dedicated employees that will serve our customers with distinction.

ECKER EXCELLENCE IN INDUSTRIAL WASTEWATER TREATMENT AWARD 2024

PRICE LANDFILL SUPERFUND SITE WASTEWATER TREATMENT PLANT

The Price Landfill site is located in the City of Pleasantville and Egg Harbor Township, Atlantic County, New Jersey. The 26-acre landfill originally was a sand and gravel excavation operation that closed in 1968. Beginning in 1971, Price Landfill began to accept a combination of both drummed and bulk liquid wastes. Wastes included industrial chemicals, sludges, oil, grease, septic tank, and sewer wastes. It is estimated that over 9 million gallons of chemical waste were disposed of at the site during landfill operations. As a result, soil and groundwater in the area are contaminated.

The site was listed on EPA's National Priorities List in 1983. The major elements of the long-term remedy, by USEPA and NJDEP, included the construction of a 300 gpm groundwater extraction and treatment system and conveyance of treated groundwater to the Atlantic County Utilities Authority WTP, and the construction of a landfill cap.

The groundwater treatment facility was a collaborative effort between CDMSmith (facility design), the United States Army Core of Engineers - Philadelphia District (construction management), and USEPA (project management). The groundwater treatment facility began operation in 2013 and consists of physical, chemical, and biological treatment processes.

The unit processes include equalization/pH adjustment, chemical precipitation/clarification, Fluidized Bed Reactors, media filtration, sludge thickening, and filter plate and frame dewatering. Air emissions are treated by an air stripper and granular activated carbon. The plant treats approximately 10 million gallons per month. The plant is operated by EA Engineering, Science, and Technology, Inc., PBC. The United States Army Corps of Engineers (USACE), on behalf of USEPA, provides oversight of the current site operations.

ECKER EXCELLENCE IN INDUSTRIAL WASTEWATER TREATMENT CERTIFICATE 2024

KEVIN POPE N3 CERTIFIED WASTEWATER TREATMENT OPERATOR **PRICE LANDFILL GROUNDWATER REMEDIATION PLANT**

Kevin Pope has 30 years of experience in quality control and operation and maintenance of groundwater treatment plants located in New Jersey. He is a licensed New Jersey treatment plant operator (VSWS, N-3, S-2, C-1 and a member of the NJWEA. He has managed quality control for investigation, oversight, and remediation support to private, local, state, and federal agencies.

Kevin is employed with EA Engineering, Science, and Technology, Inc., PBC. Kevin is responsible for the operation and maintenance of the Price Landfill Groundwater Remediation Plant and the Landfill Gas Recovery and Treatment System.

INDUSTRIAL ENVIRONMENTAL COMPLIANCE AWARD 2024

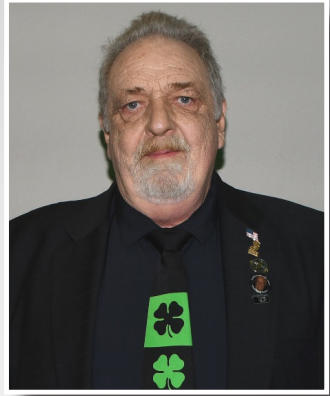

LUBRIZOL ADVANCED MATERIALS CLIFTON, NJ

Lubrizol Advanced Materials manufactures specialty chemicals used in the personal care industry. Products include fatty esters, amides, quaternary compounds, betaine compounds, amphoteric compounds, amine oxides, and other organic derivatives for industrial applications.

The facility is subject to the Organic Chemicals, Plastics and Synthetic Fibers Effluent Guidelines (40 CFR 414), and PVSC local limits parameters. They must analyze approximately four dozen parameters each month. The facility discharges approximately 15,000 gallons per day. The treatment process includes phase separation and bag filtration in process areas, equalization, and pH neutralization. Additionally, Lubrizol must maintain 24/7 pH compliance and has not had a pH excursion since 2007.

WILLIAM CLEARY

A Jersey City native, Bill served in the US Army from 1973 to 1977 where he served as a helicopter mechanic and flight engineer. Following military service he worked at Inland Steel until 1988. He was subsequently hired by the Jersey City Sewerage Authority as a Foreman.

Following his moving to Hopatcong he became involved with the Sewer Advisory Board which was charged with performing a sewer feasibility study for Hopatcong. He joined the staff of Hopatcong Water and Sewer Department rising to the position of senior operator. He holds NJDEP S-2, C-2, W-3 and T-1 licenses.

He is a member of the Hopatcong Volunteer Fire Department, American Legion, NJWEA, NJWN and WEF. He is an avid photographer and has served as NJWEA photographer at many events and conferences. His photos are featured in the NJWEA magazine "Effluents" regularly. He was inducted into the North Section Outhouse Society in 2017.

HENRY PENLEY SERVICE AWARD 2024

DENIS REHSE

Denis graduated from Virginia Tech in electrical engineering. His focus was on wireless communication working on cellular and fiber optic networks, radar systems and satellite communication. Eventually his career path took a turn to water infrastructure. In his 11 years at PSI Process, he has provided support for various pumping systems and treatment processes.

One of his more interesting projects is the Pleasure Bay pump station which includes a 3,250 ft tunnel conveying 50 MGD of wastewater from Oceanport to the TRWRA. He also teaches classes for operators and engineers providing them with the latest technologies making them more effective in their daily activities. He also “enjoys” losing golf balls at the NJWEA golf outings to help raise money for our scholarships funds.

ROCCO MAIELLANO SERVICE AWARD 2024

ROBERT CARLSON

Robert Carlson holds a BS in Chemistry and started his career at Atlantic County Utilities Authority in 1990. During the course of his career, he has served in many roles and responsibilities including Laboratory analysis and testing, operations and maintenance, served as the Licensed Operator in charge to his current position as Executive Director for the Cumberland County Utilities Authority.

Robert has also dedicated his time to the New Jersey Water Environment Association serving as Secretary, Vice President, and President of the South Section. Additionally, Robert serves on the long-range planning committee and is the Co-chairman of the Biosolids / Energy Committee. Robert has been recognized as a dedicated member of the association and has been recognized as a leader in the field receiving the WEF Hatfield and the Knights of the Golden Shovel Awards.

SAMUEL T. MCGHEE AWARD 2024

FOR OUTSTANDING COLLABORATIVE SUPPORT TO ENHANCE THE TRAINING AND CONTINUING EDUCATION OF OPERATORS, ENGINEERS, AND SCIENTISTS

MIDDLESEX COUNTY UTILITIES AUTHORITY

The Middlesex County Utilities Authority (MCUA) was established by the Middlesex County Board of County Commissioners in 1950 to responsibly manage the county's wastewater and solid waste services. To complete our mission, the MCUA operates the Edward J. Patten Water Reclamation Center in Sayreville and the Middlesex County Landfill in East Brunswick. Together, these two facilities promote public health, protection of environmental resources, and sustainability for the development and growth of Middlesex County.

The Edward J. Patten Water Reclamation Center is a 147-Million Gallon Per Day (MGD) design flow wastewater treatment plant that receives and processes wastewater from thirty-six (36) municipalities and three (3) direct industrial facilities within Middlesex, Somerset, and Union Counties. The wastewater is treated by physical and biological processes and is disinfected with Sodium Hypochlorite prior to discharge into the Raritan Bay and the Raritan River. The sewage sludge extracted from the wastewater treatment process is dewatered and thermally treated via thin film dryers to meet the time and temperature requirements for pathogen reduction. The dried material is then mixed with alkaline material to meet the vector attraction reduction requirements. The final product is a Class A material that is used as daily intermediate top cover at the Middlesex County Landfill.

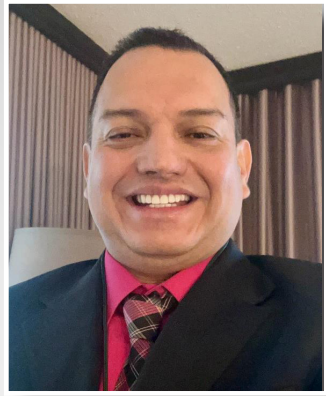

The Middlesex County Landfill opened on February 5, 1992 and consisted of three cells, each fitted with its own double-liner system, leachate collection, and secondary detection system. By 2010, additional cells were constructed, bringing the total number to nine cells. Today, the landfill accepts more than 500,000 tons of waste per year from over 850,000 residents of Middlesex County. At the end of each day, approximately six inches of cover material is placed and compacted on top of the workface. The facility has 44 groundwater monitoring wells and a leachate collection system that collects rainwater and liquid from biodegradation which is pumped into the MCUA trunk line for treatment at the wastewater facility. The landfill also has a landfill gas collection system that captures methane, which occurs naturally from decomposing waste, and transports it to the wastewater treatment facility where it is used to produce electricity for the facility.

As the MCUA operates both a wastewater treatment facility and a landfill, it is important that our employees are well-trained and kept up to date on current technologies. Our employees are encouraged to attend training, conferences, and workshops and obtain applicable licenses. It has been our honor to work with the New Jersey Water Environment Association to host mini workshops at our facility. We believe that education is the key to ensuring that the current and future workforce has the knowledge and tools needed to efficiently and competently complete the work required to serve our communities.

ROBERT ROWE AWARD FOR
LABORATORY ANALYST EXCELLENCE
2024

JULIO CABRERA

Julio Cabrera earned his bachelor's Degree in Biology and Chemistry at the University of Santiago de Cali USC (1997) in Colombia and his Master's Degree in Environmental Engineering at the Madison University in 2008. He also Holds NJDEP S2 wastewater License. He has been a WEF member since 2002.

While in Colombia, Julio has held various roles supporting the operation of wastewater treatment plants, and with the Research Center Sugar Cane (Colombia) Additionally, he has built relationships with different editorials and for this reason he has written various international publications, including "Environmental Crimes in Forestry Management in Valle del Cauca Environmental Legal Analysis". He is still an active member of the research group "Hernando Devis Echandia" (Colombia).

Julio started his career at Joint Meeting of Essex and Union Counties in 2001, after completion of the Water and Wastewater Courses. In the 20 years he was at JMEUC, he held the position of laboratory Technician, where he conducted various routine analysis, including metals and organic analysis, and has led the Industrial Laboratory team through several regulatory audits. After 20 years at JMEUC, he accepted a position at the Passaic Valley Sewerage Commission, where he currently holds the position of chemist. He specializes in wet chemistry, Inorganic analysis.

His beautiful wife Claudia, his daughter Julianna, his son Julio Jr, family, coworkers, and friends inspire him daily.

Finally, Julio wants to express gratitude to both Steve Dowhan and Joe Bonaccorso, who were great mentors and changed the trajectory of his career and life forever.

NJWEA SAFETY AWARD 2024

JANETTE KESSLER

Janette Kessler is Safety and Risk Manager for Atlantic County Utilities Authority and is Insurance Commissioner for both the Atlantic County Insurance Commission and the NJ Counties Excess Liability Insurance Fund. She serves as Safety Committee Chair for the Atlantic County Insurance Commission and Claims Committee Chair for the Atlantic County Insurance Committee and is a member of the Coverage Committee, Finance Committee, and Chair of the

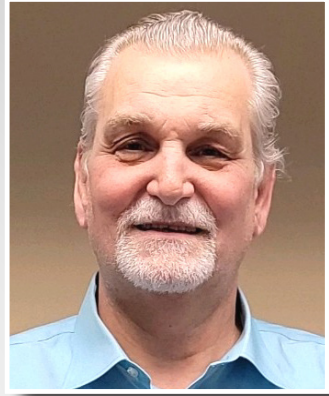

Safety Committee for the NJ Counties Excess Liability Insurance Fund.

Janette serves as Chair of the Safety Committee for the Association of Environmental Authorities. She has worked as a Safety and Risk Manager for over 25 years in various industries. Ms. Kessler specializes in insurance procurement, training, safety, and claims management for various coverages including Workers Compensation, Bodily Injury, Auto Liability, Property, EPL and UST.

Janette has a degree in Paralegal Sciences and has served on the Ethics Committee of the National Federation of Paralegal Associations. Janette is an OSHA authorized trainer. She is NIMS certified, an authorized American Red Cross CPR/First Aid/AED trainer and is a Rutgers Environmental Steward. This native New Yorker enjoys day trips to Manhattan to visit her son who resides there, traveling and dining al fresco. Ms. Kessler resides in Brigantine, NJ where since 2017, she has been a volunteer appointed by the Mayor as Chair of the Brigantine Green Team. She participates in the Brigantine Farmers Market and in her spare time, she runs a small business, providing safety consulting and training for organizations without a full-time safety employee.

ISAAC WELCOME
COLLECTION SYSTEM AWARD
2024

MICHAEL ROY, P.E.

Mr. Roy was influenced early in his life to work in environmental science because of his late father Al Roy's career as a Sanitary Engineer. His father's college professor, and later business partner, the late Dr. Genetelli encouraged Mike to study Civil Engineering with an environmental emphasis. Mike attended Virginia Tech (VT) with a full athletic scholarship and earned a starting position on VT's offensive line and graduated with a Bachelor of Science in Civil Engineering. His first job after graduation in 1981 was with Metcalf & Eddy (M&E) in New York City where he worked on both Water and Wastewater projects for M&E's large clients that included the New York City DEP.

In 1984 he came to M&E's New Jersey office, and then joined Jacobs & Cleary Consulting Engineers in Parlin, and eventually took a position with the Old Bridge Municipal Utilities Authority in 1987 as their In-House Staff Engineer where he currently works and oversees all new municipal utility construction within Old Bridge Township as well as the engineering needs of the Authority's Water and Sewer Divisions. He has recently been promoted to the position of Executive Director of the Old Bridge MUA in addition to his Authority Engineering duties.

The late Ike Welcome, previous Sewer Division Superintendent of the Old Bridge MUA, along with Henry Penley encouraged Mike to get involved with the NJWEA. Mike is a Past Central Section President and WEF Delegate and has been on the program committee for the Technology Transfer Seminars since the early 1990's and also serves on the program committee for the annual conference. Mike was inducted into the Select Society of Sanitary Shovels in 2003, and the Golden Manhole Society in 2010.

He has three grown children and currently seven grandchildren and resides in Sayreville, NJ with his wife.

HARRY P. CROFT AWARD 2024

CHRISTOPHER PABST

Chris began his career in waste water in 2007 as an operator with D2L Associates. In 2009, Chris joined the team at the Joint Meeting of Essex and Union Counties. Throughout these 15 years he rose through the ranks and wore many hats. Starting out as an entry level Operator, he became a Maintenance Mechanic and then moved into the level of leadership as an Operations Shift Supervisor. He has also held the positions of Training Coordinator, Assistant Projects Manager, Operations Manager II and finally his current position of Projects Manager.

Since 2009, Chris has been active in the NJWEA. Currently serving as the North Section President, he also remains active in many section committees. At the NJWEA State level, he serves as the Technology Transfer Committee Co-chair and on the Annual Conference Program Committee. Chris has received NJWEA Service Award, Select Society of Sanitary Sludge Shovelers, and Golden Manhole Society Awards.

Chris is a proud Marine Corps veteran having served in Iraq.

RONALD SUTO

Ron's contribution to the environmental industry has stretched over nearly 35 years. Over the years, he has worked as an operator and a consultant in many different water and wastewater treatment facilities along the East Coast and holds the highest-

level NJ licenses in both fields. He has worked with the Passaic Valley Sewerage Commission, Hamilton Township, Aqua New Jersey, CDM Smith, and Montgomery Township, among others.

He has been an educator for over 20 years, teaching the New Jersey Industrial Wastewater, Introduction to Water/Wastewater and Advanced Water Certification courses for licensing of water/wastewater and industrial wastewater system operators. As a speaker, he has presented regularly at the New Jersey Water Environment Association (NJWEA) Technology Transfer Seminars, on a variety of subjects.

He is an active member in the Association of Environmental Authorities (NJAEA), New Jersey American Water Works Association (NJAWWA), and has been a NJWEA member since the mid-1990s. He also sits on the New Jersey Department of Environmental Protection Licensed Operator Advisory Committee.

LEROY FORMAN AWARD 2024

CHRIS JEPSON

Mr. Jepson was born and raised in South Jersey. He graduated from Haddonfield Memorial High School and attended college at Emory University in Atlanta, Georgia, where he obtained a BS in Biology. He started his wastewater career at the Borough of Haddonfield WWTP in 1982. Fred Schindler's inspirational teaching of Advanced Water and Advanced Wastewater at the Camden County Vocational School then propelled Chris into the wastewater field and the NJWEA.

Chris enjoyed the biology of the activated sludge process and became wastewater-licensed soon after. When the CCMUA began absorbing the local Camden County WWTPs (Including the WWTP on the US Government's Nike missile base in Berlin), Dennis Palmer recruited Chris to be a licensed operator at the CCMUA. In 1987 he passed a civil service test, becoming an environmental engineer, one of the CCMUA's Startup Engineers and the Plant Engineer. Soon, Villanova accepted Mr. Jepson into its graduate program; Chris graduated in 1996 with an MS in Water Resources and Environmental Engineering. From 1990 - 2007, Chris was a wastewater engineer at BCM Engineers in Plymouth Meeting, Pennsylvania. January 1st, 2008 marked Chris' first day at Van Cleef Engineering, where he remains today.

Chris has participated in many wastewater projects for a variety of municipal and industrial clients. He holds the operating license for several facilities now. Chris is grateful for the support of Neal Van Cleef, Bob Clerico, and Cindy Norfleet in allowing time for Chris to establish his work at Van Cleef, especially since he landed at the firm during the recession of

2008. Most importantly, Bob Clerico and the Van Cleef leadership saw the potential of peracetic acid disinfection and encouraged Chris to explore, promote and initiate the PAA treatment process at Berkeley Heights in a demonstration in 2017, culminating in a PAA disinfection operating program in 2018. Chris credits the initial PAA work of Bob Freeborn in Ohio and the team at New Jersey's DEP who worked closely with Chris to allow the Berkeley Heights demonstration to proceed. Chris has now travelled across the nation delivering speeches and encouraging the adoption of PAA as a wastewater disinfection agent.

If you ask Chris what has catalyzed his wastewater career beyond critical friends and mentors like Fred Schindler and Dennis Palmer and encouraging supervisors at Van Cleef Engineering, he will tell you that his knowledge of and passion for biology has been the foundational element and differentiator. Chris' roles as a scientist, a biological wastewater designer, and a licensed operator have allowed him to both understand wastewater better and, especially important in his PAA work, convincingly advocate for innovation.

Chris serves on the NJWEA's Industrial Environmental Quality Committee (IEQC) and is the chairperson for the NJWEA's DRBC Technical Advisory Committee. He is a member of the Select Society of Sanitary Sludge Shovelers and the Golden Manhole Society. He continues to enjoy the wastewater field, has several hobbies including animal ecology, surfing, and soccer, and is grateful for the Puerto Rican sun, air, and waves on his annual retreats to La Isla del Encanto with his wife Christine.

CARRIE ANN LYONS

Immediately following high school graduation in 1993 Carrie Anne started working part-time for D2L Associates, Inc. as an operations technician checking small water and wastewater systems. While working for D2L Associates, she attended Brookdale College, and graduated with an Associate's Degree.

Carrie Anne began working full-time for D2L in 1995 while attending Ramapo College and in 1996 graduated with a B.A. in Fine Arts. Between 2010 and 2014 she attended courses to pursue NJDEP Operator licenses. She holds S2, W2 and C2. Licenses.

In 2011, Carrie Anne became part-owner in Lyons Environmental Services, LLC where she assists in laboratory, field sampling, operations and maintenance for multiple sewer and water systems and state reporting.

Carrie Anne is a very dedicated volunteer for the NJWEA. She has assisted on many state and central section committees.

She served as Secretary, vice president and treasurer for the central section serviced as 2018-20 President for the Central Section. Her dedication to the Central Section consists of coordinating the section's golf outing since 2014 that raises money for student scholarships and assisting on the Awards Banquet Committee.

For the State Association she is currently chair of the Mini Seminar Committee and has been actively volunteering on Registration Committee for NJWEA John J. Lagrosa Conference and Exposition since 2008 along with Technology Transfer Seminar since 2010 on Registration and Program Committee. She serves on the Long-Range Planning Committee and has been actively involved in the Public Education Committee since 2018 assisting with the Science Teachers exhibition and serving several science fairs as a judge. She also volunteers every year to assist with manning the booth at the League of Municipalities.

JOSEPH BONACCORSO OPERATOR EDUCATOR AWARD 2024

BASIL D'ARMIENTO

Basil D'Armiento has over 38 years of experience in managing public and private water utility operations and wastewater collection system facilities. As a contract operator for over 23-years and currently as an Operations Specialist with CDM Smith for the past 15-years, he has performed plant operations, plant startups, maintenance, process controls, developed and operated maintenance management systems. Additionally, Basil has developed facility operations & maintenance (O&M) manuals, training plans and standard operating procedures (SOPs).

He has provided budget oversight of facility supply purchases and maintenance and repair services, coordinated mandatory health and safety inspections and employee training programs.

Basil began his professional career by joining the US Navy upon graduating high school. He served for 6-years on active duty, going through the Naval nuclear power training program, where he was qualified as a naval nuclear power plant mechanical operator. His active-duty assignments included service on two fast attack submarines, the USS Parche (SSN-683) and was a plank owner of the USS Hyman G. Rickover (SSN-709). He was a vital part of the crew that performed initial testing and commissioning of the nuclear power plant and all the associated mechanical systems, machinery, and equipment of the propulsion plant.

Upon completion of his active-duty service, Basil attended Union County College, earning an AAS in Construction/Contracting where he then transferred to NJIT and completed his BSET degree in Construction Engineering Technology. After fifteen years Basil took the opportunity to further his education by earning an MS in Engineering Management.

Over his working career Basil has been on assignments including a wide variety of water and wastewater projects such as the Superintendent of the Public Water & Sewer Utility, Orange, NJ, the Superintendent, of the Public Water & Sanitary Utility, Easton, PA and the Superintendent of the Public Water & Sewer Utility, North Brunswick, NJ.

Other operational support assignments have included the Startup Services for a 200-mgd Surface Water Treatment Facility, in NJ. The O&M Startup Services for a 240-mgd Ultraviolet Disinfection System, in Ohio, O&M Startup services for a 2,000-mgd Catskill-Delaware, Ultraviolet Light Disinfection Facility, in New York City, and similar activities for a 40-mgd Water Treatment Facility (WTF) in Virginia.

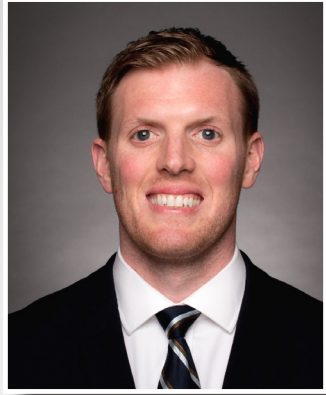

Throughout his career Basil has maintained his primary licenses, Water Treatment System Operator: New Jersey (T-4), 1995; Pennsylvania (Water A, E 1,2,3,4,5,6,7,8,9,10,11,12,13, 14), 1998. Water Distribution System Operator: New Jersey (W-4), 1994. Collection System Operator: New Jersey (C-4), 2007.

Basil has been a member of the Central Section of NJWEA/WEF since 1988 after he received the Michael S. Kachorsky award for undergraduate two-year college from the Central Section. Basil is currently a member of the NJWEA Program Committee tasked with developing the technical program for the Collection Systems Operator session. Basil also serves as a commissioner to the Plainfield Area Regional Sewer Authority (PARSA).

NJWEA OUTSTANDING YOUNG WATER ENVIRONMENT PROFESSIONAL 2024

KEVIN WHITNEY

Kevin J. Whitney II received a Bachelor's of Environmental Science from Rutgers University in 2011, and began his professional career with GeoCleanse International, Inc. There he served as an in-situ environmental remediation Specialist and Site Supervisor for highly contaminated sites, both in the United States and in Europe (Belgium). In February 2015, Kevin began his career in the public sector with the Atlantic County Utilities Authority (ACUA). During his 7+ years with the ACUA, he served in roles as Research & Development Project Analyst and Wastewater Regulatory Compliance Specialist/ Coordinator. While working, Kevin attained a Masters of Professional Studies in Renewable Energy and Sustainability Systems from Pennsylvania State University in 2020.

Upon entering the wastewater industry with ACUA, Kevin became a member of NJWEA/WEF and began attending NJWEA Tech Transfers, Annual Conferences and South Section meetings; in 2019, he was nominated and accepted the role of Secretary of the NJWEA South Section Executive Board. While serving on the Board, Kevin has focused on consolidating committee efforts to achieve the Section's goals of increasing the membership, increasing participation, and including the next generation of operators and professionals in our industry.

In July 2022, Kevin took a new professional role as Senior Advisor at the Cape May County Municipal Utilities Authority (CMCMUA), where he has continued to expand his knowledge and skill set within the environmental utility industry, inclusive of wastewater and solid waste management. Similar to efforts of the NJWEA, there is a clear focus of the CMCMUA, and its projects, to continue to provide innovative, clean, and reliable environmental stewardship for generations to come. As of May 2024, Kevin serves as Vice President of the NJWEA South Section Executive Board.

NJWEA WASTEWATER HALL OF FAME 2024

RUSSELL E. NERLICK, P.E.

Russell Nerlick's interest in the field of water and wastewater management started early. It was strengthened during his college days at the Newark College of Engineering (now New Jersey Institute of Technology). Upon graduation in 1968 with a Bachelor of Science degree in chemical engineering, he joined the New Jersey Department of Health as a Chemical Engineer Trainee (later to be part of the NJDEP formed in 1970). Russ advanced to a Senior Principal and later Supervising Environmental Engineer at the NJDEP until 1981.

From 1981 until his retirement in 2001, Russ had served as the Executive Director and Chief Engineer of the Western Monmouth Utilities Authority in Englishtown, NJ. At the Authority, as he was when at the NJDEP, he had been an advocate for wastewater reuse and recycle. He was in part responsible for the innovative reed-bed biosolids treatment at the WMUA championing reuse.

Russ was a Licensed Professional Engineer, Professional Planner, Licensed S-4 and C-4 operator in NJ. He was also a member of the Association of Environmental Authorities, New Jersey Society of Professional Engineers, a Diplomate of the American Academy of Environmental Engineers, and a past chairman of the WEF Safety and Occupational Health Committee.

Russ had been a member of the NJWEA since 1973. He was a past President (1998 – 2000), past chairman of the Public Relations Committee, Safety Committee and Publications Committee. He was active on the Program Committee and Tech Transfer Committee helping to coordinate topics and speakers and often being a speaker at seminars. He was a proud member of the Select Society of Sanitary Sludge Shovelers (1991), a charter member of the Golden Manhole Society (1998), and a member of the Order of the 55 Gallon Drum (1999). He was a past recipient of the Harry P. Croft Award (1996), William D. Hatfield Award (1998), through the WMUA, received the Burke Safety Award (1996) and other acknowledgments of his contribution to the NJWEA.

Russ Nerlick was an active volunteer and an advocate for volunteerism within the NJWEA. He worked on advisory committees with the NJDEP in attempts to instill common sense approaches to operations, recycle-reuse, and land application. He was dedicated to public education outside of the Association and continuing education for our members. He was confident in his actions, yet humble in his appreciation of those he worked with at the Association. In his final Presidents Message in the NJ Effluents, he was sure to acknowledge his mentors and friends. A partial portion of the message, with a little edit, is presented below.

My first thank you goes to Chris Hoffman who was my first supervisor when I started working for the Department of Health. My next thank you goes to Tony Ricigliano who suggested that I consider joining the Water Pollution Control Federation. My next thank you goes to our belated Presidents Sol Seid and Joe Howe, who nurtured me throughout my professional development and suggested that I consider becoming an officer of this Association. The next thank you goes to Mike Lyons and Rocco Maiellano, who preceded me as President and taught me how to be presidential. My next thank you goes to Jim De Block and Frank Hartman, who will succeed me, for their support and work for me over the past two years. My next thank you goes to the Executive Committee with special thanks to, of course, Jack Lagrosa and Jeane Decker, who do most of the work. The next thank you goes to the committee chairmen and members of the committees who worked so hard to sustain and improve our Association.

Russ also went on to thank his wife Eileen for her support and contribution hosting the Spouses' Program and the WMUA commissioners and staff and apologized to anyone he had forgotten. Near his closing message he reaffirmed, "Education has always been the basis for this Association whether through our members or through scholarships. I believe that the future of our Association will be also based upon continued education."

Russell Nerlick passed away on March 28, 2002, at the age of fifty-five. He remained active with the Association up through the time he took ill. He influenced many in a very positive manner as a professional in the environmental field, an active member of his community and as a friend to all he came into contact.

NJWEA WASTEWATER HALL OF FAME 2024

ROBERT VILLÉE

Rob Villée has served in the wastewater industry since 1977. Over his professional career, Rob worked at four sewerage authorities in New Jersey, including South Monmouth Regional SA, Hazlet Township SU, Northeast Monmouth County Regional SA, and settling at the Plainfield Area Regional Sewerage Authority (PARSA) in 1996. Rob retired from PARSA in 2019 after 23 years as Executive Director. Rob has received awards from USEPA for his work in the US Virgin Islands, and from WEF, AEA, and NJWEA for his work on collection systems. He is the recipient of both the WEF and NJWEA Collection System Awards.

Rob served as the NJWEA Central Section President in 1996-1998 and as the National Collection System Chair for WEF in 2010-2012. Rob Chaired the NJWEA Operations Challenge Committee and was PWOD/PWO Representative on the Executive Committee. Rob was vice Chair of the Public Education Committee. Rob has spent and continues to spend much of his time on public education. He actively participated in committee programs such as the Adopt-A-School and similar public-school programs, regional science fairs, the NJ Science Teachers Convention, at the League of Municipalities and more recently with programs on “flushable” wipes.

Since 2011, Rob has focused on the issue of flushable wipes. This earned him the nickname “Lord of the Wipes”. During this time, he has been one of the lead members in the wastewater industry taking on the manufacturers self-created technical guidelines for flushability. This led to the creation of the PARSA Potty in 2013 to challenge the claim that a brand of flushable wipe broke up during the flush. Additionally, with the help of the PARSA staff, they duplicated the manufacturers disintegration test apparatus, the Slosh Box. The data produced from these devices were instrumental in the FTC case against that manufacturer.

Rob has been involved in both national and international negotiations on Flushability. He was the WEF representative on the 2014 Joint Workgroup on Flushability, and the 2015-2017 negotiations with the wipe manufacturers trade association on their 4th Edition of their Flushability Guidance Document. He was also the United States wastewater representative for ANSI on the 2015-2018 ISO Technical Specification for Flushability.

In 2016 he was part of an international wastewater group that published the “*International Water Services Position Statement on Flushability*”. This was signed by 30 countries and over 300 organizations. Rob is currently a member of the International Water Service Flushability Group (IWSFG.org), that in 2018 published a wastewater approved Technical Specification for Flushability. Rob’s role has been the design of the benchtop disintegration test. The group has members from Australia, Canada, Japan, New Zealand, Spain, Turkey, and the United States. For his effort on wipes Rob was one of the inaugural recipients of the WEF Volunteer Service Recognition Awards in 2017 and the NACWA Distinguished Service Award in 2020. Retirement hasn’t slowed Rob down. He, along with his Canadian Colleague Barry Orr, served as technical advisors for the Charleston, SC Lawsuit, where Kimberly-Clark agreed to have their flushable wipes meet the IWSFG Technical Specification, which utilizes the disintegration Test designed by Rob. In recent years, Rob provided presentations for the Australian, New Zealand, and Japanese Wastewater Associations. Rob continues to take an active interest and role in advocating for compliance in use and definition of the flushable wipe.

Rob holds S-4, C-4 and N-2 NJDEP operator licenses. Rob is a member of the Select Society of Sanitary Sludge Shovelers (1998), a charter member of the NJWEA Golden Manhole Society and recipient of the WEF Collection System Committee Golden Manhole Society. Rob has received the NJWEA Collection System Award (1998), Public Education Award (2002), the USEPA Environmental Quality Award, Arthur Sidney Bedell Award (2003), Leroy Forman Award (2020), Central Section Service Award (1995), the Central Section Thomas Crapper Award (1998) as well as other honors.

Rob Villée has and continues to provide the NJWEA, WEF and other organizations in the United States and internationally his wisdom and expertise in environmental science attaining the noted status of a member of the NJWEA Wastewater Hall of Fame.

NEW JERSEY WATER ENVIRONMENT ASSOCIATION

• THE ARTHUR SIDNEY BEDELL AWARD •

The Arthur Sidney Bedell Award was established to acknowledge extraordinary personal service to a Member Association. General criteria may include organizational leadership, administrative service, membership activity, stimulation of technical functions, or similar participation. However, the Member Associations have ultimate control over the selection of criteria. The award is named for the second president of the Federation, who exemplified its purpose by his long devotion and service to the New York Sewage and Industrial Wastes Association, now the New York Water Pollution Control Association.

WATER ENVIRONMENT FEDERATION

• THE WILLIAM D. HATFIELD AWARD •

The William D. Hatfield Award is given to operators of wastewater treatment plants, who through their outstanding performance and professionalism deserve commendation. The Member Association controls the process of selection, but the Federation has set up a general system of criteria. These include a successful system of reports from the operator to his superiors that fulfill the informational requirements of his supervisors and provide the operator with a forum for suggestions for improvements. Consideration is also given to the financial acumen of the candidate, the use of a good public relations program and the dissemination of information concerning advancements in the field. This award was established in honor of Dr. William D. Hatfield's years of service as a treatment plant operator.

PAST RECIPIENTS

1957	Anthony J. Macri	1992	Ike Welcome
1958	William Applegate	1993	Blake Maloney
1960	Edward Lawler	1994	Robert Grodeska

NEW JERSEY WATER ENVIRONMENT ASSOCIATION

WATER ENVIRONMENT FEDERATION

• GEORGE BURKE FACILITY SAFETY AWARD •

This award was established in 1982 in honor of George W. Burke, Jr., for his many years of service to both the water environment field and the Federation as staff manager of technical services. Mr. Burke was instrumental in developing the Federation's annual safety survey and assisting in the production of several safety training aids and promotional packets. The purpose of this award is to encourage an active and effective safety program in municipal and industrial wastewater facilities.

Innovating New Jersey's Future Today

Sustainable, cost-effective engineering and environmental solutions have been our focal point since 1965. Wastewater or water supply, environmental remediation, architecture or civil engineering, we live by an unwavering commitment to total customer satisfaction.

- Wastewater collection and treatment
- Biosolids and residuals management
- Advanced nutrient removal
- Collection systems/pumping stations
- Combined sewer overflow (CSO) management
- Enhanced operations/management consulting
- Odor control monitoring, treatment modeling
- Sanitary sewer condition assessment and rehabilitation
